 Return to CIA Library

About 40 twin-engine aircraft with double rudder assembly were still parked at the STRAUSBERG (N 53/V 15) airfield. Three or four planes made individual flights on both 12 and 13 December 1949. No work of any kind was observed at the field.

25X1A

 Comment:

Compared with observations made in November 1949 the occupation strength apparently has not changed. It is assumed that a regiment equipped with twin-engine aircraft is still stationed at the field. It has not been ascertained whether it is a bomber regiment or a fighter reconnaissance regiment.
